GULFSTREAM POLO COMMUNITY DEVELOPMENT DISTRICT

INTRODUCTION

The Gulfstream Polo Community Development District (“District”) is a local unit of special-purpose government created pursuant to and existing under the provisions of Chapter 190, *Florida Statutes*. Under Florida law, community development districts are required to take affirmative steps to provide for the full disclosure of information relating to the public financing and maintenance of improvements to real property undertaken by such districts. Unlike city and county governments, the District has only certain limited powers and responsibilities. These powers and responsibilities include, for example, construction and/or acquisition, as well maintenance, of roadways, utilities, earthwork, stormwater management, landscape, irrigation, entry features, lighting, conservation and mitigation, and other related public infrastructure.

**DISCLOSURE OF PUBLIC FINANCING AND MAINTENANCE
OF IMPROVEMENTS TO REAL PROPERTY UNDERTAKEN BY
THE GULFSTREAM POLO COMMUNITY DEVELOPMENT DISTRICT**

Under Florida law, community development districts are required to take affirmative steps to provide for the full disclosure of information relating to the public financing and maintenance of improvements to real property undertaken by such districts. The law specifically provides that this information shall be made available to all persons currently residing within the District and to all prospective District residents. The following information describing the Gulfstream Polo Community Development District and the assessments, fees and charges that may be levied within the District to pay for certain community infrastructure is provided to fulfill this statutory requirement.

What is the District and how is it governed?

The District is an independent special taxing district, created pursuant to and existing under the provisions of Chapter 190, *Florida Statutes* (the “Act”), and established by Ordinance 2016-046 enacted by the Board of County Commissioners of Palm Beach County, Florida, effective as of October 4, 2016. The District encompasses approximately 203.54 acres located entirely within the boundaries of Palm Beach County, Florida. As a local unit of special-purpose government, the District provides an alternative means for planning, financing, constructing, operating and maintaining various public improvements and community facilities within its jurisdiction.

The District is governed by a five-member Board of Supervisors (the “Board”), the members of which must be residents of the State and citizens of the United States. Within ninety (90) days of appointment of the initial board, members were elected on an at-large basis by the owners of property within the District, each landowner being entitled to one vote for each acre of land with fractions thereof rounded upward to the nearest whole number. Elections are then held every two years in November. Commencing when both (i) six years after the initial appointment of Supervisors have passed and (ii) the District has attained a minimum of two hundred and fifty (250) qualified electors, Supervisors whose terms are expiring will begin to be elected by qualified electors of the District. A “qualified elector” in this instance is any person at least eighteen (18) years of age who is a citizen of the United States, a legal resident of Florida and of the District, and who is also registered with the Supervisor of Elections to vote in Palm Beach County. Notwithstanding the foregoing, if at any time the Board proposes to exercise its ad valorem taxing power, it shall, prior to the exercise of such power, call an election at which all members of the Board shall be elected by qualified electors of the District.

Board meetings are noticed in a local newspaper and conducted in a public forum in which public participation is permitted. Consistent with Florida’s public records laws, the records of the District are available for public inspection during normal business hours. Elected members of the Board are similarly bound by the State’s open meetings law and are generally subject to the same disclosure requirements as other elected officials under the State’s ethics laws.

**What infrastructure improvements does the District provide
and how are the improvements paid for?**

The legal description of the lands encompassed within the District is attached hereto as **Exhibit A**. The District is comprised of approximately 203.54 acres, identified as Pods B, C, D & E in the *Fields at Gulfstream Polo PUD* (the “PUD”), located entirely within Palm Beach County, Florida, depicted in the map attached as **Exhibit B**. The public infrastructure necessary to support the District’s development program includes, but is not limited to: Lake Excavation, Surface Water Management System, Concrete Curb and Gutter, Water Distribution System, Sanitary Collection and Transmission System, Sound Barrier Wall, and Perimeter Buffer. These infrastructure improvements are more fully detailed below.

To plan the infrastructure improvements necessary for the District, the District adopted the *Gulfstream Polo Community Development District Engineer’s Report Infrastructure Improvements*, dated May 15, 2017, which details all of the improvements contemplated for the completion of the infrastructure of the District (the “Capital Improvement Plan”). Copies of the Capital Improvement Plan are available for review at the District’s office.

These public infrastructure improvements have been or will be funded by the District’s sale of bonds. On April 24, 2017, the Fifteenth Judicial Circuit Court of the State of Florida, in and for Palm Beach County, Florida, entered a Final Judgment validating the District’s ability to issue an aggregate principal amount not to exceed \$15,000,000 in Special Assessment Bonds for the funding of the Capital Improvement Plan.

On August 22, 2017, the District issued a series of special assessment bonds for the purposes of financing a portion of the costs of the construction and acquisition of infrastructure serving the District on those lands identified as Phase 1, also known as Pod B (the “Series 2017 Project”). On that date, the District issued its Gulfstream Polo Community Development District, Special Assessment Bonds, Series 2017 (Phase 1 Project), in the amount of \$2,870,000 (the “Series 2017 Bonds”). Accordingly, the proceeds of the Series 2017 Bonds are being used to finance a portion of the cost of the acquisition, construction, installation, and equipping of the Series 2017 Project.

Lake Excavation and Surface Water Management System and Concrete Curbing/Gutter

The surface water management system is divided by the LWDD L-13 canal into two separate stand-alone water management basins. The North Basin (Pod B of the PUD and a portion of Polo Road south of Lake Worth Road) will consist of inlets, manholes and storm pipes that direct runoff to the on-site lake system for detention prior to discharge into the Lake Worth Drainage District (LWDD) L-13 Canal adjacent to the south property line. The South Basin (Pods C, D, and E of the PUD and the adjacent Polo Road) will consist of inlets, manholes and storm pipes that direct runoff to the on-site lake system for detention prior to discharge into the Lake Worth Drainage District (LWDD) L-13 Canal adjacent to the north property line and the LWDD E-2W canal along the east property line. Both systems also include the littoral area planting and maintenance. The surface water management system is located in easements granted to the District or in easements to be granted to the District. The surface water

management system in Pod B is substantially complete, but no other surface water management systems for any of the other pods have been constructed.

The lake excavation for the project consists of the contractor's mobilization, supervision, clearing and grubbing, demolition, dewatering, lake excavation to twelve (12) feet below design water level, and stockpiling the material adjacent to the lake. These activities also include storm water pollution prevention measures. The excavated material will be used onsite to construct the roads and house pads. Lake excavation for Pod B in the North Basin is substantially complete.

The on-site common roadways, which will be private with a gated entrance, consist of two and four lane urban sections. The stormwater components include concrete curb and gutter and concrete valley gutter which are an integral part of the surface water management system. The roadways are located in tracts to be deeded to the homeowner's association with an easement granted to the District for drainage, water, and sewer purposes. The valley gutter and curb and gutter within Pod B are substantially complete. Other than the stormwater components, the District did not and will not finance the private gated roads.

Water Distribution System

The onsite water distribution system is composed of 6" and 8" diameter mains, fire hydrants, and water services to all of the lots within the District for potable service and fire protection. There is a 12" diameter water main proposed on Polo Road, but since this is considered an offsite improvement it has not been included. There are four connection points; one to the existing 12" main on the north side of Lake Worth Road at Blanchette Trail and three to the existing 12" main in Polo Road. The 6" ductile iron water mains branch from the main lines to serve the fire hydrants. The water mains within Pod B have been installed, but testing has not been completed. No water main installation has commenced in Pods C, D, and E.

Sanitary Sewer Collection and Transmission System

The sewage collection and transmission system consists of two lift stations, 6" on-site force main, 6" off-site force main, 8" polyvinyl chloride (PVC) gravity pipe, manholes and 6" service laterals. The Pod B lift station is located at the northeast corner of the project, on the west side of San Fratello Circle. The lift station has been sized to accommodate additional development outside the boundaries of the District. The increased size of the lift station and force to accommodate the additional sewer flow is approximately 25%. The Pod C and D lift station is located near the northwest corner of San Fratello Circle and Cinch Way and will only be designed to accommodate the Pod C and D development. The 6" force main extends west and north on-site to Polo Road then north to a proposed 6" force main located just south of the LWDD L-13 canal. Pod E is served by an existing 8" gravity main stub located on the west side of the property. The 8" PVC gravity pipe extends throughout the project to serve all the units. As of the date of this report, the sewer in Pod B is nearly complete, but no testing has been completed. No sewer installation has commenced in Pods C, D, and E.

Florida’s Turnpike Sound Barrier

Due to the proximity of the project to the Florida’s Turnpike, Palm Beach County requires a sound barrier along the east property line to mitigate future traffic noise. A traffic noise study was performed by RS&H, Inc. and reviewed by the Florida Department of Transportation and Palm Beach County. The sound barrier is generally a combination of 6-foot high berm and 10-foot high wall to obtain the required height along the east property line and about 300 feet of 10- foot high wall extending west at each end of the wall. The berm and wall will be owned and maintained by the District and will be located in an easement granted to the District on land owned by the homeowner’s association.

Perimeter Buffer

The project is surrounded by a buffer within an easement granted to the District on land owned by the homeowner’s association. The buffer will contain landscaping, irrigation, fence, and project sign walls at the entrances to Pods B and C.

Assessments, Fees and Charges

The costs of acquisition or construction of a portion of these infrastructure improvements for the Series 2017 Project have been financed by the District through the sale of the Series 2017 Bonds. The annual debt service payments, including interest due thereon, are payable solely from and secured by the levy of non-ad valorem or special assessments against lands within Pod B of the District which benefit from the construction, acquisition, establishment and operation of the District’s improvements. The annual debt service obligations of the District which must be defrayed by annual assessments upon each parcel of land or platted lot within Pod B will depend upon the type of property purchased. Provided below are the current maximum annual debt service assessment levels for property within Pod B of the District for the Series 2017 Bonds (the “Series 2017 Debt Service Assessments”). Interested persons are encouraged to contact the District Manager for information regarding special assessments on a particular lot or parcel of lands. A copy of the District’s assessment methodology and assessment roll are available for review at the District’s office.

The current maximum annual Series 2017 Debt Service Assessments per product type are as follows:

Development Plan Type of Use	Pod B Units	Maximum Annual Debt Assessment Per Unit*	Maximum Annual Debt Assessment Per Unit Type*	Bond Debt Allocation Per Unit*
Single Family Residential	1	\$1,095.00	\$1,095.00	\$16,191.00
Zero Lot Line Residential	86	\$1,000.00	\$86,000.00	\$14,734.00
Residential Townhome	140	\$766.00	\$107,240.00	\$11,334.00
Totals	227	N/A	\$194,335.00	N/A

*Does not include a 4% discount for early payment of assessments, a 1% fee for the Tax Collector, and a 1% service fee for the Property Appraiser.

The Series 2017 Debt Service Assessments described above exclude any operations and maintenance assessments (“O&M Assessments”), which may be determined and calculated

annually by the District's Board of Supervisors and are levied against benefitted lands in the District. A detailed description of all costs and allocations which result in the formulation of assessments, fees, and charges is available for public inspection upon request.

The Capital Improvement Plan and financing plan of the District infrastructure as presented herein reflect the District's current intentions, and the District expressly reserves the right in its sole discretion to change those plans at any time. Additionally, the District may undertake the construction, reconstruction, acquisition, or installation of future improvements and facilities, which may be financed by bonds, notes, or other methods authorized by Chapter 190, *Florida Statutes*.

Method of Collection

The District's Series 2017 Debt Service Assessments and/or O&M Assessments may appear on that portion of the annual real estate tax notice entitled "non-ad valorem assessments," and will be collected by the Palm Beach County Tax Collector in the same manner as county ad valorem taxes. Each property owner must pay both ad valorem and non-ad valorem assessments at the same time. Property owners will, however, be entitled to the same discounts as provided for ad valorem taxes. As with any tax notice, if all taxes and assessments due are not paid within the prescribed time limit, the tax collector is required to sell tax certificates which, if not timely redeemed, may result in the loss of title to the property. The District may also elect to collect the assessment directly.

This description of the District's operation, services and financing structure is intended to provide assistance to landowners and purchasers concerning the important role that the District plays in providing infrastructure improvements essential to the use and development of this community. If you have any questions or would simply like additional information about the District, please write to the District Manager at: Gulfstream Polo Community Development District, Special District Services, Inc., 2501A Burns Road, Palm Beach Gardens, Florida 33410 or call (561) 630-4922.

The information provided herein is a good faith effort to accurately and fully disclose information regarding the public financing and maintenance of improvements to real property undertaken by the District and should only be relied upon as such. The information contained herein is, and can only be, a status summary of the District's public financing and maintenance activities and is subject to supplementation and clarification from the actual documents and other sources from which this information is derived. In addition, the information contained herein may be subject to change over time, in the due course of the District's activities and in accordance with Florida law. Prospective and current residents and other members of the public should seek confirmation and/or additional information from the District Manager's office with regard to any questions or points of interest raised by the information presented herein.

IN WITNESS WHEREOF, this Disclosure of Public Financing and Maintenance of Improvements to Real Property Undertaken has been executed as of the _____ day of _____, 2017, and recorded in the Official Records of Palm Beach County, Florida.

RE: Gulfstream Polo Community Development District

The Gulfstream Polo Community Development District is required to select an auditor to perform the audit for the district for the years ending September 30, 2017, September 30, 2018 and September 30, 2019; with an option for an additional two year renewal (Fiscal Year Ending September 30, 2020 and September 30, 2021).

In accordance with the Auditor Selection procedures as outlined by Florida Statute 218.391, the District has established the auditor selection criteria and has placed a legal advertisement requesting proposals from qualified audit firms.

The firm of Grau & Associates was the only firm to respond to the legal advertisement requesting proposals to perform the fiscal year ending September 30, 2017, September 30, 2018 and September 30, 2019 audits. The proposed fee for the audit for fiscal year ending September 30, 2017 is \$3,200.00. The proposed fee for the audit for fiscal year ending September 30, 2018 is \$3,300.00. The proposed fee for the audit for fiscal year ending September 30, 2019 audit is \$3,400.00. The proposed fee for the fiscal year ending September 30, 2020 audit is \$3,500.00 and the proposed fee for the fiscal year ending September 30, 2021 audit is \$3,600.00. The approved Audit Fee budget for Fiscal Year 2017/2018 is \$4,000.00.

It is recommended at this time that Grau & Associates be hired to perform the September 30, 2017, September 30, 2018 and September 30, 2019 annual government audits with an option, to perform the fiscal year end audits for the following two years (FYE September 30, 2020 and September 30, 2021).
